As far as possible, EU declarations of conformity for standardised articles will soon be available for our customers on our website.

## 2. Identification of the Transport-Packaging

| Characteristic      | Description                                                                            |
|---------------------|----------------------------------------------------------------------------------------|
| Product name        | Outer packaging                                                                        |
| Article number      | see packaging base                                                                     |
| Packaging type      | Transport packaging                                                                    |
| Material            | all materials used for corrugated board                                                |
| Material quality    | all qualities used for corrugated board                                                |
| Basis weight        | all basis weights generated for our transport packaging                                |
| Dimensions          | all dimensions used by us                                                              |
| Intended Use        | Transport of folding boxes, games, game components between Ludo Fact and our customers |
| Weight of packaging | all weight units we use                                                                |

## 3. Subject of the Statement

We hereby inform you that the above-mentioned transport packaging meets the requirements of Regulation (EU) 2025/40 on packaging and packaging waste applicable at the time of placing on the market.

The conformity assessment of our transport packaging was carried out in accordance with Article 38 PPWR on the basis of the conformity assessment procedure "Internal production control (Module A)" and on the basis of the information/declarations of our supplier.

## 4. Compliance Information

Conformity assessment regarding:

- Article 5 – Substance restrictions
- Article 6 – Recyclability
- Article 9 – Minimum percentage of recyclates (where applicable)

# Information on the conformity of our transport packaging

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

Version 002-EN / Stand: 10.09.2026

- Article 10 – Minimization of packaging
- Article 11 – Reusability (not applicable)
- Article 12 – Labelling and information requirements (where applicable)

## 5. Material composition

| Material        | Percentage [%] |
|-----------------|----------------|
| Recyclingkarton | 95 - 99        |
| Printing inks   | 0,5 - 2        |
| Varnish         | -              |
| Adhesive        | < 0,5          |

## 6. Assessment of recyclability

The packaging was assessed for its recyclability in the paper and cardboard recycling stream.

The packaging consists mainly of fibrous materials, contains no metallisation and no plastic lamination and can be collected via the established waste paper collection.

The assessment is based on the technical requirements and assessment methods available at the time of issuance

## 7. Food contact (if applicable)

In the case of transport packaging for glued folding cartons for the food sector, it is also confirmed that the transport packaging used complies with the relevant requirements of Regulation (EC) No. 1935/2004 and the other applicable food law regulations.

## 8. Technical documentation

The technical documentation on which this information is based is retained in accordance with the requirements of the PPWR and made available to the competent market surveillance authorities upon justified request.

## 9. Validity

This statement applies to our transport packaging in the specified design. Changes to material, construction, composition or legal requirements may require re-evaluation.

The undersigned informs, under the sole responsibility of the manufacturer, that the transport packaging referred to in this document complies with the requirements of Regulation (EU)

# Information on the conformity of our transport packaging

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)
